The preparation of this Report and compilation of the trend data (1977-2011) has been done with the courtesy of Gallup Pakistan (www.gallup.com.pk) and Gilani Research Foundation (www.gilanifoundation.com) as a public service for members of Gallup International Association. For any further details please contact: Rushna.Shahid@gallup.com.pk

Disclaimer: Gallup International Association or its members are not related to Gallup Inc., headquartered in Washington D.C which is no longer a member of Gallup International Association. Gallup International Association does not accept responsibility for opinion polling other than its own. We require that our surveys be credited fully as Gallup International (not Gallup or Gallup Poll). For further details see website: www.Gallup-international.com

FOREWORD

The World's First and the Leading Global Barometer

The Global Barometer of Hope and Despair, conducted on the eve of every new year since 1977, happens to be the world's first Global Barometer. It was initiated and led by the renowned pollster Dr. George Gallup in that year and has since been conducted annually by research institutes affiliated with Gallup International and other associated research institutions. In 2011 we will be celebrating 34 years of its success.

In 1977 the world was still a stranger to modern computing machines on everyone's desk. It was a world in which the old Main Frame computers were available to the fortunate. Others performed their tasks in more primitive ways. The mode of communication was the Post Office supplemented by what was known as the "Telegraph and Telex Machine". Despite these limitations, the first Global Barometer was conducted by 22 Gallup International Association members across the globe. They included all the G7 countries as well as key countries from all continents. The number of countries has since risen considerably and the survey now covers a highly representative sample of global population. In 2011 the survey covers 58 countries from all parts of Asia, Africa, Latin America and Australasia.

Considering that the Global Barometer was initiated in 1977 under conditions which would now seem primitive by way of international communications as well as information technology, the archives of the Global Barometer were not in a position to present trend data in usable form. It has taken some effort to construct time series data.

It was a proud privilege for Gallup Pakistan to have accomplished that task in 2010. Despite being relatively limited in its scope, the trend data information is now usable and amendable to updation. It has been updated for the latest year (EOY: 2011)

In the covers of these pages you will find a simple computation of the top lines of country data for all years when the survey was conducted in that country. We hope that we will further refine these Reports, in due course of time.

We would particularly like to thank the team at Gallup Pakistan as well as Ms. Armida Wagman at the Gallup International Secretariat who in 2010 helped compile the trend data for the first 33 years of the series. We very much hope that with the active support of the Expert Group on Opinion Research (details on the Blog of the Group) at WIN-Gallup International we will be able to further pursue this task.
